INDEX TO VOLUME 39

ARTICLES

Achievement in College Physics, The Effect of High School Physics and College Laboratory Instruction on, Haym Kruglak, 219–222.

Adaptability, Professional Training and, Kenneth E. Anderson, 161–164.

Atomic Energy, Children Ask to Study, Louise A. Neal, 42–46.

Attitudes Possessed by Selected Elementary School Pupils, Science Information and, Stanley B. Brown, 57–59.

Automation: A Challenge to Educators, Harold S. Spielman, 102–140.

Basic Premises as an Approach to Science in General Education, The Teaching of, W. C. Van Deventer, 389–398.

Biology Courses in High Schools, An Analysis of Principles and Activities of Importance for General, Margaret J. McKibben, 187–196.

Children Ask to Study Atomic Energy, Louise A. Neal, 42–46.

Competencies of Students Preparing to Teach in the Elementary School, The Science Backgrounds and, George Greisen Mallinson and Harold E. Sturm, 398–405.

Conference Highpoints and Implications for the Future, Katherine E. Hill, 35–36.

Contributions of Science to Selected Problem Areas Proposed for a Program of General Education in the Secondary School, Monir K. Mikhail, 300–304.

Cooperative Committee of the AAAS for 1953–54, A Report to the NARST on the Activities of the, George Greisen Mallinson, 225–228.

Curriculum Trends in City School Systems, Paul R. Pierce, 223–224.

Determination of Earth Science Principles Desirable for Inclusion in the Secondary School, Loren T. Caldwell, 196–213.

Development of the Science Program in Childhood Education in the Great Neck Public Schools, The, Tracy Ashley, 27–35.

Earth Science Principles for Inclusion in the Science Program of General Education in the Secondary School, Determination of, Loren T. Caldwell, 196–213.

Elementary Classroom Teacher to Include Science in Her Program, Helping, 16–17.

Elementary Science with Every Teacher a Researcher, Needed Research in the Teaching of, W. C. Croxton, 17–21.

Energy Concept in General Education, The, George W. Haupt, 257–261.

General Biology at the Kansas State Teachers College of Emporia, John Breukelman, 305–314.

George Webster Haupt, Clarence M. Pruitt, 334.

Instruction in Textbook Reading and Achievement in Elementary Engineering Physics at the University of Minnesota, Haym Kruglak, 156–160.

Ionization in General Chemistry Textbooks, 1887–1940, The Treatment of Auborn Russ Hall and Will S. DeLoach, 314–323.

Joe Young West, Katherine E. Hill, 331–332.

Kenneth E. Anderson. Clarence M. Pruitt, 186–187.

L. Paul Elliott, Clarence M. Pruitt, 332.

Learning Unlimited, Margaret Kaeiser, 161.

Meetings of the Association for the Education of Teachers in Science, 1954, 36–39.

National Association for Research in Science Teaching Financial Report, Clarence M. Pruitt, 233.

Nature Study Should Differ for Different Age Groups, Ernest Harms, 51–54.

Needed Research in the Teaching of Elementary Science with Every Teacher a Researcher, W. C. Croxton, 17–21.

Officers of NCES, 15.

Official Minutes of the Business Meeting of the National Association for Research in Science Teaching, Clarence M. Pruitt, 234–235.

Opinion of Students on College General Education Science, A Study of the, Thomas P. Fraser, 213–219.

Out-of-School Science Experiences, Relationship Between the Science Information Possessed by Ninth Grade General Science Students and Certain School and, John H. Woodburn, 164–167.

Physical Science, A Course in, William K. Noyce, 323–331.

Physical Science Laboratory Programs in College General Education, Scientific Thinking: A Basis of Organization for, James S. Perlman, 287–300.

Physical Science Principles in the Elementary School Curriculum, The Selection and Grade Placement of, Renato E. Leonelli, 54–57.

Predicting Biology Regents Grades from Personality of Ninth-Year Students, Henry Gould, 265–286.

Primary Grades, Science by Radio for Children of, Gertrude B. Hoffsten, 47–51.

Principles and Activities of Importance for General Biology Courses in High Schools, An Analysis of, Margaret J. McKibben, 187–196.

Professional Training and Adaptability, Kenneth E. Anderson, 161–164.

Program of the National Council for Elementary Science, 13–15.

Program of the Twenty-Seventh Annual Meeting of the National Association for Research in Science Teaching, 231–233.

Pupils in Elementary School, A Comparative Study of the Achievements of, Donald Allen Boyer, 3–12.

Reading Difficulty of Unit-Type Textbooks for Elementary Science, The, George Greisen Mallinson, Harold E. Sturm, and Lois Marion Mallinson, 406–410.

Science Achievement of Pupils in Elementary Schools, A Comparative Study of the, Donald Allen Boyer, 3–12.

Science Backgrounds and Competencies of Students Preparing to Teach in the Elementary School, The, George Greisen Mallinson, and Harold E. Sturm, 398–405.

Science by Radio for Children of Primary Grades, Gertrude B. Hoffsten, 47–51.
Science Curriculum at Willimantic State Teachers College, Robert K. Wickware, 22–26.
Science Education Research Studies—1953, Kenneth E. Brown, Paul E. Blackwood, and Philip G. Johnson, 141–156.
Science Education Research Studies—1954, Paul E. Blackwood and Kenneth E. Brown, 372–389.
Science Information and Attitudes Possessed by Selected Elementary School Pupils, Stanley B. Brown, 57–59.
Science Information Possessed by Ninth Grade General Science Students and Certain School and Out-of-School Science Experiences, Relationship Between the, John H. Woodburn, 164–167.
Science Program in Childhood Education in the Great Neck Public Schools, The Development of the, Tracy Ashley, 27–35.
Scientific Manpower: The Problem and Its Solution, F. L. Fitzpatrick, 97–102.
Scientific Method as Applied to Personal-Social Problems, The, Paul De H. Hurd, 262–265.
Scientific Terminology on Television, Testing, C. Gustav Hard and Donald P. Watson, 140–141.
Scientific Thinking: A Basis of Organization for Physical Science Laboratory Programs in College General Education, James S. Perlman, 287–300.
Selection and Grade Placement of Physical Science Principles in the Elementary School Curriculum, The, Renato E. Leonelli, 54–57.
Summary and a Look to the Future, G. Marian Young, 21.
Summary of the Presentation and Panel on Current Trends in Education and Implications for Research in Science Education, Abraham Raskin, 229–230.
Third Annual Review of Research in Science Teaching, Herbert A. Smith, Nathan Washton, Jacqueline Buck Mallinson, Clarence Boeck, and Thomas P. Fraser, 335–371.
Thirty-first Yearbook and Twenty Years of Elementary Science, The, Theresa J. Lammers, 39–41.
Walter, Clyde Croxton, Clarence M. Pruitt, 224.
What Elementary Teachers Want in Workshops in Elementary Science, N. Eldred Bingham, 59–64.
Workshops in Elementary Science, What Elementary Teachers Want In, N. Eldred Bingham, 59–64.
1954 Elected Members of NARST, 230.

AUTHORS
